### **DETAILED ACTION**

The prior Election/Restriction requirement is withdrawn and is replaced with the following:

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1-5, pertaining to a method including forming a doped polysilicon plug so as to define a substantially convex upper plug surface;

Species 2, claim 6, pertaining to a method including forming a doped polysilicon plug by filling a contact hole to less than the uppermost extent of the insulating sidewalls so that the profile is substantially free of concavities;

Species 3, claim 7, pertaining to a method including forming a doped polysilicon plug by partially filling the contact hole so that the profile is substantially free of concavities;

Species 4, claims 8-9, pertaining to a method including forming a doped polysilicon plug by completely filling the contact hole so that the profile is substantially free of concavities;

Species 5, claim 10, pertaining to a method including forming a doped polysilicon plug by partially filling the contact hole to define a convex upper plug surface profile.

Species 6, claims 11-13, pertaining to a method forming a one-half fit line contact feature and in a second dimension a two one half field poly line and forming a convex upper plug surface profile;

Species 7, claim 14, pertaining to a method including forming a storage node such that it is characterized by a contact hole bounded by insulating sidewall;

Art Unit: 2813

Species 8, claim 15, pertaining to a method including pertaining to a method forming a one-half fit line contact feature and in a second dimension a two one half field poly line and forming a upper plug profile free of concavities;

Species 9, claim 16, pertaining to a method forming a one-half fit line contact feature and in a second dimension a two one half field poly line and partially filling the storage node contact hole;

Species 10, claim 17, pertaining to a method forming a one-half fit line contact feature and in a second dimension a two one half field poly line and completely filling the bit line contact hole;

Species 11, claim 18 pertaining to a method forming a one-half fit line contact feature and in a second dimension a two one half field poly line and partially filling the storage node contact hole thereby forming a convex upper plug surface profile.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
